Using Cucumber for collaboration

Rurik Greenall / Computas AS

Scenario: View the conference programme Given I am on the ELAG 2018 website When I click the programme button Then I see the conference programme Scenario: Vis konferanseprogrammet til ELAG Gitt at jeg er på websida til ELAG 2018 Når jeg klikker "programme"-knappen Så ser jeg konferanseprogrammet Given(/^I am on the ELAG 2018 website \$/) do
 driver.navigate.to "http://elag2018.org/"
end

When(/^I click the programme button\$/) do
 driver.findElement(:id, "menu-item-2918").click
end

Then(/^I see the conference programme\$/) do
 programme = driver.findElement(:class, "schedule")
 # silly check, might work
 expect(programme).not_to be_empty
end

Not...a testing tool

c.f. https://cucumber.io/blog/2014/03/03/the-worlds-most-misunderstood-collaboration-tool

Code smell

And I verify that the data are correct

- And I wait
- And I wait
- And I wait

Customer focus: Cucumber helps business [wider organisations] and IT collaborate to build a shared understanding of the business goals

Cucumber: a collaboration tool

c.f. <u>https://cucumber.io/blog/2014/03/03/the-worlds-most-misunderstood-collaboration-tool</u>

- Specification workshops (three amigos) with:
 - People who define requirements
 - Programmers
 - Testers
- **Together:** write examples that define specification
- Programme tests, program software, run tests, repeat...
- <u>Together:</u> Ensure that scenarios are relevant over time, update...

Example

- Small team:
 - Product owner
 - Technical/Functional team lead
- Together, write (gherkin) specs for a minimal viable product
- Implement tests, code
- Check specs against currently understood criteria...

Benefits

- Single source of truth: specifications, tests and documentation are in the same document
- Living documentation: because they're automatically tested by Cucumber, your specifications are always bang up-to-date
- Customer focus: Cucumber helps business
 [wider organisations] and IT collaborate to build
 a shared understanding of the business goals

- <u>Cucumber documentation</u>
- <u>Gherkin documentation</u>
