Links quality for/by human and machines

An interface dedicated to linkage tasks

Aline Le Provost, Abes (Montpellier, France)
French agency for higher education and research

Network of 150 institutions, 1450 libraries

~ 3000 cataloguers

14 millions of bibliographic records

2.7 millions of people described
The goal
To allow our users to easily visualise, control, create and/or correct links between bibliographic records and authority records.

The background
- **Qualinca** multipartners research project (2012-2016)
- Expert knowledge representation
- Results
  1. *SudoQual*, a program to diagnose and cure linkage problems
  2. *Paprika*, an interface for cataloguers
