2010 English

Research report on the Czech aspect of European citizenship – the state of ethno-national diversity, migration, gender situation, attitudes to the EU, understanding of the European polity and European public sphere. The study brings original results of a representative survey of Czech citizens (N=1037) in addition to the first, preliminary results of media analysis and interviews with political and cultural elites. This volume, the Czech contribution to international Eurosphere project, is a part of a series of 16 Eurosphere country reports, it serves also as a framework for interpretation of Eurosphere empirical results. It contains a number of graphs, tables and illustrations. It is complemented by illustrations by a cartoonist Miroslav Kemel.
