

International
**OPEN ACCESS
WEEK**

22th – 28th October 2012

National Technical Library
in cooperation with
Institute of Chemical Technology, Prague
organizes 2nd year of the seminar

Open Access or Open your mind!

24. 10. 2012 from 9:30, Balling Hall, National Technical Library

PROGRAM

9:00–9:30 Registration

9:30–10:15 Introduction (Martin Svoboda, director of the National Technical Library)

10:15–10:45 Open Access activities at the EU level (Daniel Spichtinger, European Commission)

This presentation provides an overview of the open access activities of the European Commission as a policy maker and major funder of scientific research through the FP7 and Horizon 2020 framework programmes as well as activities

in the European Research Area (ERA). Furthermore the Commission also encourages national policy initiatives on access to, dissemination and preservation of scientific information.

10:45–11:15 Open Access – successful OA policy in Czech Republic (Radka Syrová, Jan Palach Library)

Does Czech institutions support and require Open Access? Practical examples of OA - donating golden road, supporting

grey and green road to OA via repositories of universities in Czech Republic.

11:15–11:30 Break

11:30–12:00 Selected legal aspects of Open Access (Matěj Myška, Institute of Law and Technology, Masaryk University)

This presentation will focus on practical legal problems connected with the application of the Open Access practice to scientific papers. Attention will be mainly paid to the Creative Commons licenses and their use in OA, the legal aspects of building a green OA repository and legal issues

of self-archiving. These issues will be addressed from the position of author, institution and commercial publishers. Theoretical discussions of the above mentioned problems will be supplemented by practical examples and experience from building OA repository at the Masaryk University.

12:00–12:30 Open Data and where to put them? (Tereza Simandlová, National Technical Library)

The scientific community and general public is not only interested in Open Access to the fulltexts but also in Open Data. Open Data enhance the information transfer, save money and increase the transparency of scientific

communication. Lately Open Data have become a trend across many research fields. The paper aims to present the Open Data initiative, Enhanced publication term and also present examples of data repositories.

12:30–13:00 Altmetrics: An alternative route for evaluation of scientific articles (Jakub Szarzec, National Technical Library)

Trends in measuring of the impact of research results does not change often. The number of citations is still a traditional way how to quantitative measure the impact of the articles on the scientific community. The presentation will be discussed how innovative Altmetrics tool that uses

social networks. It will be offered a comparison between this instrument and the current situation. Do these methods affect the sharing of scientific information? Are social networks the right way for measuring the quality of scholarly publications?
