GreyNet

Grey Literature Network Service

“**Grey Literature** is a field in library and Information science that deals with the production, distribution, and access to multiple document types produced on all levels of government, academics, business, and organization in electronic and print formats not controlled by commercial publishing *i.e.* where publishing is not the primary activity of the producing body.”

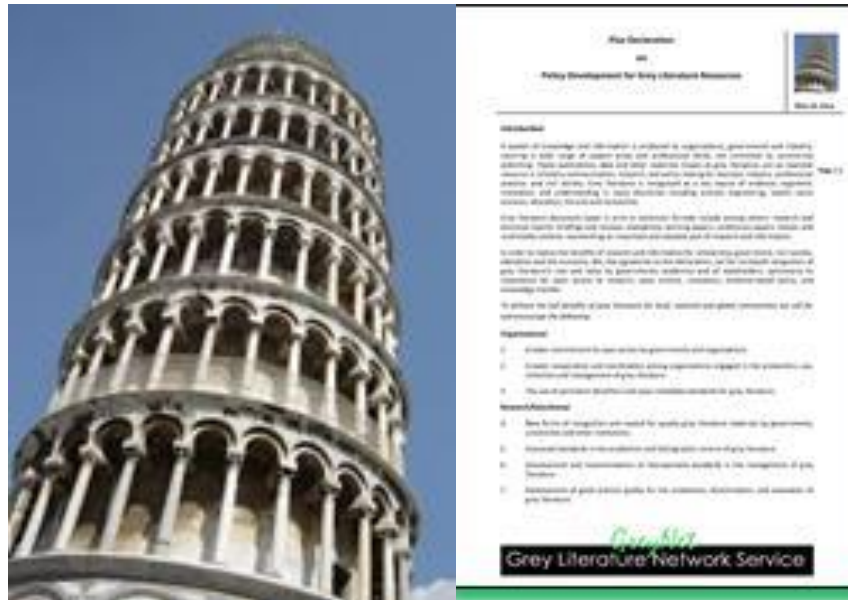

Luxembourg, 1997 - New York, 2004 – Prague, 2010

Pisa Declaration

New Roadmap for Grey Literature

GreyNet
Grey Literature Network Service

First, the organizational commitment is to open access, to further cooperation and coordination between and among grey literature communities, sharing open data standards.

GreyNet

Grey Literature Network Service

Second, the commitment to research and education, where recognition and reward is associated with quality grey literature, and where attention is given to good practices in the field.

GreyNet

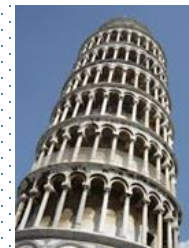

Grey Literature Network Service

Third, the commitment to address and safeguard legal issues inherent to grey literature by exploring the various types of licensing agreements now available and by fostering constructive relations with commercial publishers.

GreyNet

Grey Literature Network Service

Fourth, a commitment to sustainability linked to a financial prerequisite. Identifying funding and grants for special collections and repositories, commitment to long term preservation, and investments in new technologies.

GreyNet

Grey Literature Network Service

Fifth, a firm technical commitment, guarantee to continued online services and further crosslinking of textual and non-textual content. A commitment from tackling broken links to facilitating interoperability regardless of the system or portal in which grey literature and its accompanying data are housed.
