

DocEnhance

Transferable skills in doctoral education: the gate to different sectors

KRECon, Prague, 10-11 November 2022

Alexandra Bitušíková, UMB

This project has received funding from the European Union's Horizon 2020 Science with and for Society programme under grant agreement no. 872483

DocEnhance

Structure

- **Short intro to the project DocEnhance**
- **Importance of transferable skills training in doctoral education**
- **Work package 1: Skills investigation and intelligence - objectives**
- **Results**
- **Recommendations**

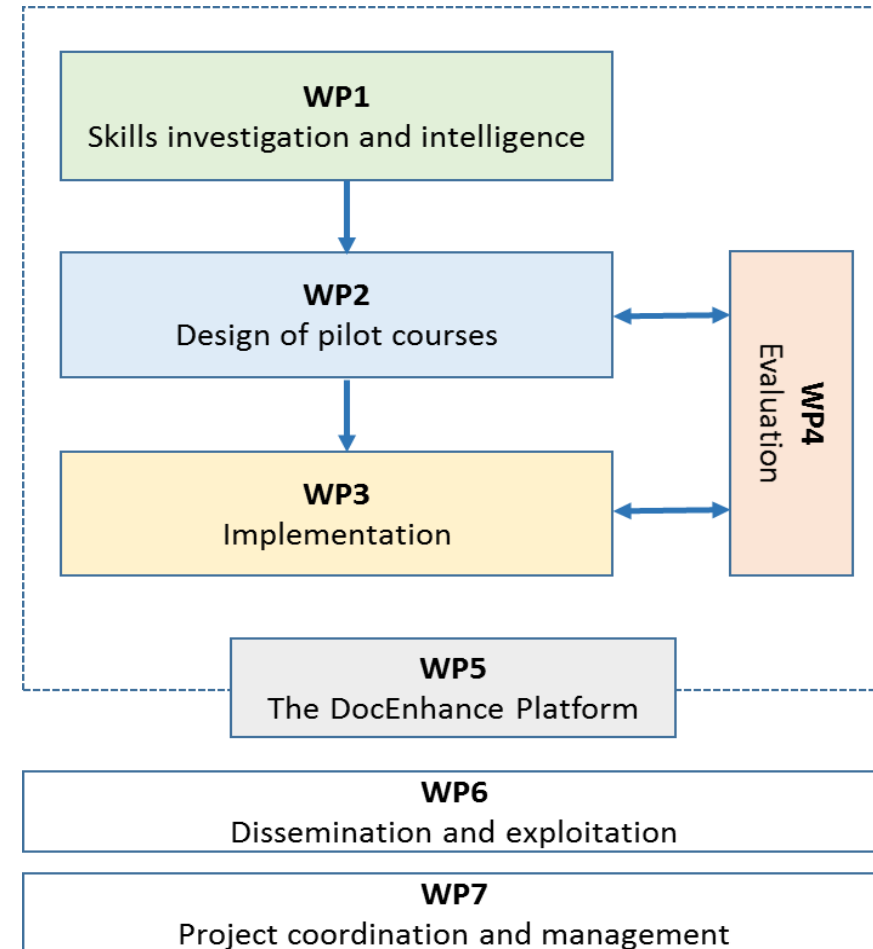

This project has received funding from the European Union's Horizon 2020 Science with and for Society programme under grant agreement no. 872483

DocEnhance

The overall objective of DocEnhance

- To build the **DocEnhance network and online platform to develop and integrate transferable skills training into PhD education in Europe, and to increase interaction with and exposure to the non-academic sector.**

This project has received funding from the European Union's Horizon 2020 Science with and for Society programme under grant agreement no. 872483

DocEnhance

WP1 Objectives

- **To build a diverse network of academic and non-academic actors in the field of doctoral education**
- **To increase knowledge transfer and ensure cooperation btw sectors**
- **To identify and prioritise future transferable skills**
- **To run a career-tracking survey among partner universities**

This project has received funding from the European Union's Horizon 2020 Science with and for Society programme under grant agreement no. 872483

DocEnhance

Importance of transferable skills

- Transferable skills are skills learned in one context (for example research) that are useful in another (for example future employment whether that is in research, business etc.).
- Transferable skills may be acquired through training or through work experience. (EC, Principles for Innovative Doctoral Training, 2011).
- Offering training in transferable skills, including understanding the ethics of research, is central, and should be a priority for doctoral schools and programmes.
- Professional development of doctoral candidates includes awareness about skills attained through doing research as well as of the wide range of career choices for doctorate holders.
- Building ties to the other sectors contributes to bridging the communication gap with potential employers and recruiters (EUA 2010).
- The importance of transferability of skills from research and academia to other places of employment (The League of European Research Universities, 2010).
- Transferable skills may also contribute to better research outputs and they can help to maximise them by enabling researcher to be effective in research, as well as adaptable and flexible in an increasingly mobile and global research environment (OECD 201, KIRD 2010).
- Transferable skills may be increasingly important in collaborative and cross-disciplinary work and work in teams. The capacity of researchers to communicate with others is essential for interdisciplinary work (EUA, 2009, p. 87).

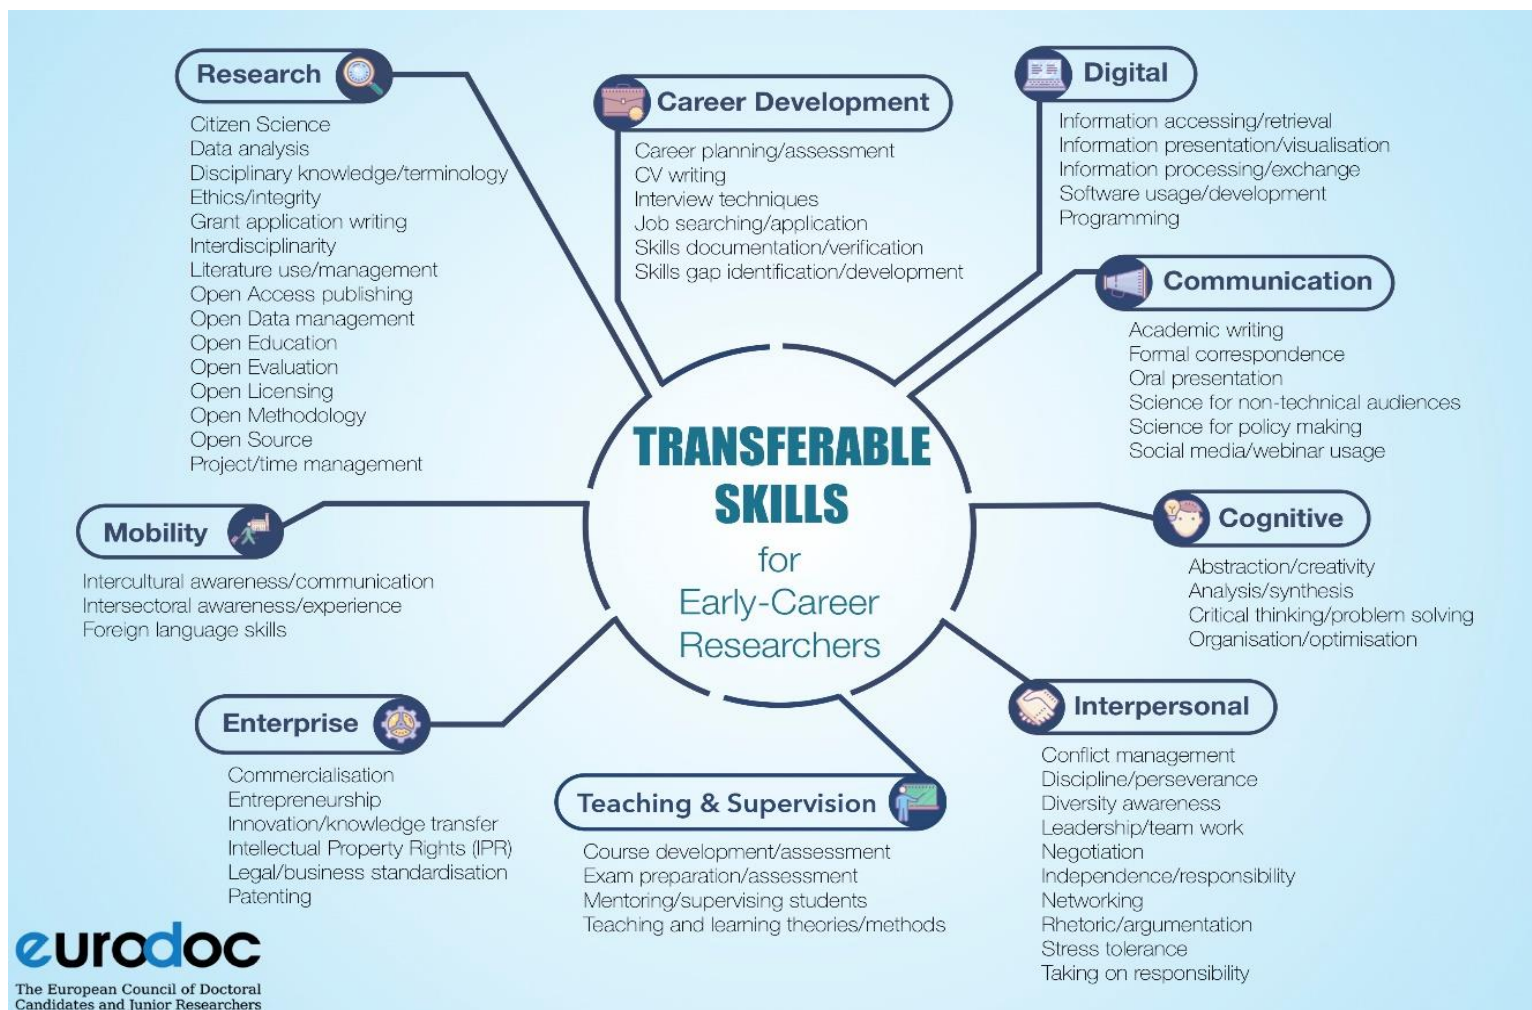

This project has received funding from the European Union's Horizon 2020 Science with and for Society programme under grant agreement no. 872483

Transferrable skills for Early-Career Researchers

Weber, C. T. et al. (2018) Identifying and Documenting Transferable Skills and Competences to Enhance Early Career Researchers Employability and Competitiveness. Brussels: European Council of Doctoral Candidates and Junior Researchers. doi: 10.5281/zenodo.1299178

This project has received funding from the European Union's Horizon 2020 Science with and for Society programme under grant agreement no. 872483

DocEnhance

Regional stakeholder workshops

- ✓ 4 skills-prioritizing workshops organized for external stakeholders
- ✓ Each workshop focused on a career sector chosen to represent crucial challenges of the 21st century
- ✓ The purpose of the RSWs was to understand what skills are needed across Europe within each of the chosen sectors
- ✓ The recommended curricula and pilot courses (WP2) are designed by outcomes of RSWs

Transferable skills in non-profit sector, 10.9.2020, Slovakia

Doctoral education in cooperation between industry and the university, 2.10.2020, Finland

Transferable skills in Technology sector, 27.10.2020 and 3.11.2020, Spain

Regional stakeholder workshop 10.11.2020, Norway

This project has received funding from the European Union's Horizon 2020 Science with and for Society programme under grant agreement no. 872483

Career-tracking survey (CTS)

- Launched on 9 March 2021 and closed on 15 April 2021, collecting more than **2,220 responses** from the nine participating universities
 - Aristotle University of Thessaloniki (Greece), UiT Arctic University of Norway Tromsø (Norway), Maastricht University (Netherlands), Technical University of Munich (Germany), University of Alcalá (Spain), University of Chemistry and Technology Prague (Czech Republic), Matej Bel University (Slovakia), NOVA University Lisbon (Portugal) and University of Sassari (Italy)
- 60-70 questions, 8 different sections (doctoral education, skills, transition to first/next employment, employment and career related experience, intersectoral and geographical mobility and demographic details)
- Overall response rate: 25 %

DocEnhance

Motivations to pursue a doctorate by field of a doctorate degree.

	Natural sciences	Engineering and technology	Medical and health sciences	Agricultural sciences	Social sciences	Humanities	Total
To work as a researcher in academia	63.0%	67.4%	38.7%	28.1%	38.3%	31.7%	47.9%
To work as a researcher outside academia	36.4%	35.5%	14.3%	14.1%	10.2%	7.9%	18.8%
To work as a highly skilled expert	68.6%	84.9%	36.1%	18.3%	30.6%	22.5%	40.9%
To diversify career opportunities	50.8%	65.5%	40.0%	35.2%	25.4%	18.4%	34.9%
Personal accomplishment	64.7%	88.9%	52.5%	26.7%	38.7%	30.0%	45.6%
Interest in the research topic	80.1%	99.2%	43.1%	26.7%	40.4%	31.7%	50.9%
Social recognition	16.6%	25.5%	17.4%	12.7%	14.4%	5.4%	12.1%

Note: percentages do not sum 100% because each respondent could choose all the motivations that apply in his/her particular case.

This project has received funding from the European Union's Horizon 2020 Science with and for Society programme under grant agreement no. 872483

DocEnhance

Average rated benefits of the doctoral programme for career development

Note: Average rates measured using a Likert scale from 1=strongly disagree with the statement to 5=strongly agree with the statement. The distinction between researchers and non-researchers only applies to those employed respondents.

This project has received funding from the European Union's Horizon 2020 Science with and for Society programme under grant agreement no. 872483

DocEnhance

Executive summary of CTS

- Doctorate holders are mostly satisfied with their doctorate programmes
- Doctorate holders quickly find employment after graduation both in and outside the academia although temporary contracts persist as a common (and unwelcome) situation
- Most doctoral programmes offer transferable skills training, although these tend to focus on academic skills
- The added value of the doctorate on careers was overall positive, but less so for those in non-academic, healthcare and government sectors
- The content and structure of doctorate programmes exerts a clear influence on skills development

This project has received funding from the European Union's Horizon 2020 Science with and for Society programme under grant agreement no. 872483

DocEnhance

RECOMMENDATIONS FOR DOCTORAL TRAINING INSTITUTIONS

- Provide transferable skills trainings covering more than just research and academic skills and work with supervisors on promoting these
- Encourage skills development through different routes – formal skills training, collaboration and mobility during PhD as well as on-the-job training
- Provide informed career advice early in the doctoral training, with more targeted approach for some groups
- Promote transferable skills strategically depending on the desired career path and help doctoral researchers build their skills portfolios

This project has received funding from the European Union's Horizon 2020 Science with and for Society programme under grant agreement no. 872483

DocEnhance

Useful outputs produced by DocEnhance

- Good practice recommendations for integration of transferable skills training in PhD programmes
- DocEnhance platform as a part of PhD hub
- PhD training in three transferable skills courses and Open Educational Resources
- Interaction model for educational collaboration between the academic and non-academic sector
- What comes after a PhD? Findings from the DocEnhance survey of doctorate holders on their employment situation, skills match, and the value of the doctorate

This project has received funding from the European Union's Horizon 2020 Science with and for Society programme under grant agreement no. 872483
