ELAG 2018

No, not yet, but...

How to prevent link rot (404 Not Found) and content drift?

- Are you using persistent URIs?

How to prevent link rot (404 Not Found) and content drift?

- Are you using persistent URIs?
- Are your persistent URIs persistent?

How to prevent link rot (404 Not Found) and content drift?

- Are you using persistent URIs?
- Are your persistent URIs persistent?
- For a how long time?

How to prevent link rot (404 Not Found) and content drift?

- Are you using persistent URIs?
- Are your persistent URIs persistent?
- For a how long time?
- Who guarantees it?

How to prevent link rot (404 Not Found) and content drift?

- Are you using persistent URIs?
- Are your persistent URIs persistent?
- For a how long time?
- Who guarantees it?
 - Cool URIs: your webmaster? <https://www.w3.org/Provider/Style/URI>
 - URN: your national library?
 - DOI: a non-profit organization?
 - PURL: "OCLC and Internet Archive work together to ensure future sustainability of Persistent URLs" <https://www.oclc.org/en/news/releases/2016/201623dublin.html>
 - ...

Long term preservation of linked metadata (and contents behind the links)?

- Are you publishing your metadata only or also as linked data?
- Do you store flat metadata (or labels + links) for preservation purposes?
- Are you storing linked data in your (closed) preservation system?

Long term preservation of linked metadata (and contents behind the links)?

- Are you allowed to store (=make copies of) the contents behind links?
- GDPR: Issues with personal data (right to be forgotten etc)
- Should you make updates to the descriptive metadata of AIP packages ?
- Or store basic metadata with identifiers (in SIPs) to later link dissemination packages with living, linked and updated metadata?

Thank You
